WORKSHOP TOPICS

PARTICIPANT TESTIMONIALS

"The benefits of LAAL are numerous...

(1) From knowing we have leaders who aren't afraid to have the tough conversations... to leaders who are using different engagement strategies with their teams, we can see the change in leaders' behaviors.

(2) The fact that LAAL comes with individualized coaching as well gives our participants the ability to customize what they learned each month into practice on the job.

(3) Finally, since the program also includes engaging participants' managers, we see three levels of impact with this program, which is why we continue to invest in this program for our people."

-Abby, VP, HR, Financial Services industry

"[The series] has helped me to communicate efficiently and effectively... Being able to work collaboratively in class with real life examples helped put everything into motion.

With the tools learned throughout the 12-month course, I have been able to adapt my leadership and communication styles when needed. I truly believe the class gave me a solid foundation for continued growth.

-Paige Williams, Michael Lewis Company
